

# Product Information Update

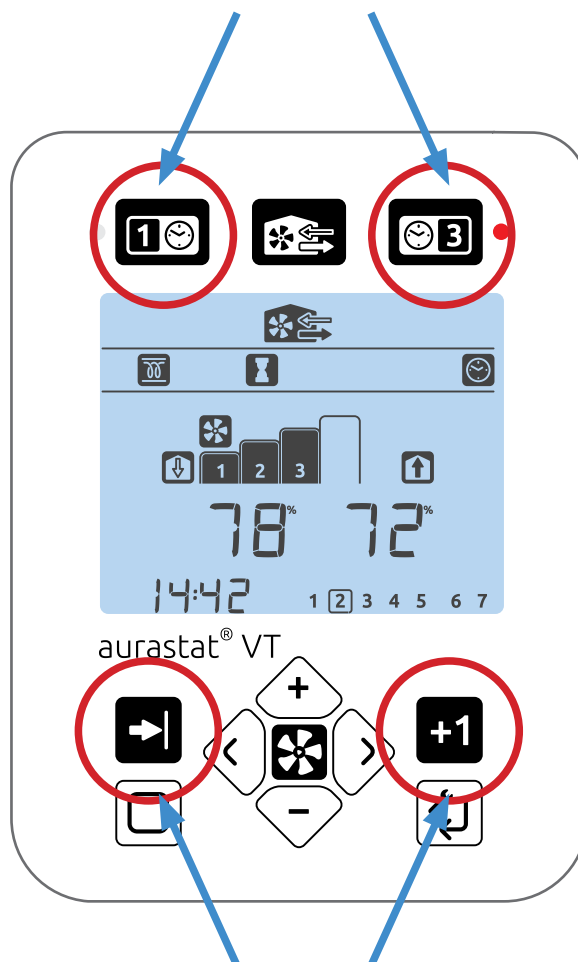

## aurastat® V

The aurastat® V controller is only suitable for use with 'B' Model MVHR units.

The aurastat® V part number **TP526** is now no longer available.

Where it is necessary to replace an aurastat® V (**TP526**), the replacement version will be called aurastat® VT Lite (**TP533**) and have the appearance of the VT but the timer related buttons will not function and some icons present on the VT will not be displayed.
